## DETAILED ACTION

### *Specification*

Substitute specification has been entered.

### *Information Disclosure Statement*

As discussed in the IDS, applicant is requested to provide a translation of the foreign publication, especially concerning the apparatus shown on page 5.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7,9-15 are rejected under 35 U.S.C. 102 (b) as being anticipated by Stiggins et al, Gordon, or Riley. Each of these references shows a garbage disposal including a side water inlet **capable** of forming a water baffle.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bebinger. This patent discloses the creation of a water baffle silencer; see figure 2.

This is the heart of the invention of these claims. The manner in which the baffle is formed is a design choice only once the formation of a baffle was known as in Bebinger. Thus, it would have been obvious for one of ordinary skill in the art to modify Bebinger by providing a water inlet to help form the water baffle, since the manner in which the baffle is formed would have been a design choice only.

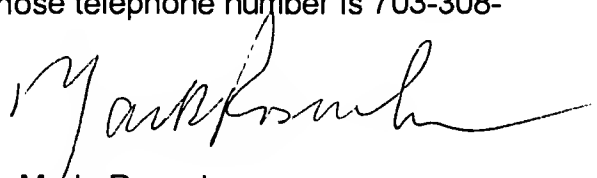

***Allowable Subject Matter***

Claims 8,16,21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
